

# Three-Rail Trains Look—and Run—Better on ScaleTrax™

**It's not about the track.** Railroading is about huge machinery that makes the ground shake when it goes by. In model railroading, the track is just a stage setting that should make your trains look more real and more massive -- and no three-rail track does that better than ScaleTrax, the lowest-profile, best-running 3-rail O gauge track system.

**Compare** our track with 3-rail track systems from Atlas O and Ross Custom Switches, and check out the advantages of ScaleTrax

## Track Features

- Solid, rust-proof nickel silver rails
- Durable ABS ties for years of use
- Easy, snap-together assembly
- Built-in electrical connections eliminate need for rail joiners or track pins
- Built-in Lockon receptacle in every track section
- Non-derailing switches
- Snap-in, reversible switch motors work on either side of track
- Compatible with virtually all three-rail locomotives and cars

## Lower Cost

ScaleTrax track and switches are more affordable than comparable Atlas and Ross products.

## More Realism

Prototypically scaled, lower profile rail and ties make your locomotives and rolling stock look more massive on ScaleTrax.

## Smaller Third Rail

The thinnest, lowest-profile center rail of any major track brand gives ScaleTrax a more realistic look.

## Better Electrical Contact

Concealed, large, spring-loaded contacts deliver more secure electrical connections between track sections.

## Smoother Switches

Thanks to our ramped and beveled frog and lower profile rail, ScaleTrax offers the smoothest-rolling switches in O gauge.

## Easier-To-Use Flex Track

Low-profile rail and ties make ScaleTrax flex easier to bend than other brands.
